

RIGHT TRACKS

ONE PLANET

LYRIC SHEET

VERSE 1

From the highest of all mountains
To the deepest of the seas
We're surrounded by nature
That all works in harmony
But the temperature is rising
And they're chopping down trees
What can we do to protect our
world
To keep it safe and clean?

If we use less plastic that would be
fantastic
The fish in the oceans agree
If we walk or ride, or we put out
the lights
We can all save on energy

CHORUS

*Cos we've got ... one planet
Can we manage
To leave it as healthy as we found
it
Hey! This is our home!
All people
Every nation
Let's get caring for creation
Hey! This is our home!*

VERSE 2

Well all things bright and beautiful
And beasts of every size
Need our help to protect them
If they're all gonna survive
From polar bears of ice caps
To the lions of the plain
For the sake of earth's creatures
We all need to make a change

A lot less pollution would be the
solution
And everyone can play a part
Eat food that's grown near you,
recycle what you use
It's action that's really not hard.

CHORUS (X2)

*Cos we've got ... one planet
Can we manage
To leave it as healthy as we found
it
Hey! This is our home!
All people
Every nation
Let's get caring for creation
Hey! This is our home!*

This is our home!
